1	Introduction	1
1.1	Significant of the study	4
1.2	Need of the study	5
2	Review of Literature	22
2.1	Market Segmentation: Literature Review	23
2.2	Retailing in India	105
2.3	Shopping Tourism	126
2.4	Retail format in India	136
2.5	Choice of Retail store and Retail store format	154
2.6	Cluster validity function	162
2.7	Stability of segmentation	172
3	Statement of the Problem	177
	The Gap in the literature: The problem	179
	Design of the market segmentation	
	<i>Deriving the store-image-attribute importance and formation for segment descriptors</i>	
	<i>Types of clustering procedure and other technical tools for segmentation</i>	
	<i>Number of stores and Type of retail format</i>	
	<i>Optimization criterion</i>	
	<i>Statistical test</i>	
	Research Objective	198

	Limitation	199
4	Research and Design Methods	201
4.1	Research Process and Scale Inquiry	201
	<i>Applied Scale development for store images based on behavioural pattern of shoppers</i>	
	<i>Store Image as a strategic Tool</i>	
	<i>Store Image Measurement</i>	
4.2	Methodology	205
	Scale criteria	
	Scale Development Process	
	<i>Shoppers typology development</i>	
	<i>Specifying the domain of the construct</i>	
	Generation of sample items and theoretical scale purification	
	Measurement Purification	
	Assessing Reliability & Validity	
5	Data Analysis and Findings	252
5.1	Influences of Shoppers attitude on store formats/Type choice	252
5.2	Optimum number of segmentation for initial iteration purpose	271
5.3	Segmenting retail shoppers based on behavioural pattern of store images	280
5.4	Measuring the stableness of market segmentation	291
5.5	Building predictive model based on the hard cluster solution	292
5.6	Statistical test	302
6	Conclusion	338
	a) Bringing out a viable alternate methodology for developing a typology of shopper based on behaviour patter toward various retail store images.	
	b) Develops a measurement scale based on the shopper typology	
	c) Influence of Shoppers behavioural attitude on Store formats & Type Choice.	
	d) Validation the fuzziness and optimization for number of cluster	
	e) Measuring the stability of the segments	
	f) Developing predictive model to discriminate among group and to grid the market	
	g) Relationship between the store images attribute segmentation and store type choice	
	Direction for further research	350
